

SHARJEEL AHMED

OBJECTIVE

Results-oriented **Software Engineering** student at the **University of Karachi**, dedicated to driving business growth by deploying high-impact **Flutter and Python Backend solutions**. I aim to leverage my expertise in **clean architecture** and **Firebase/REST API integration** to streamline development cycles and enhance product scalability for your team. Passionate about transforming complex technical requirements into **user-centric digital products** that deliver measurable value and operational efficiency.

WORK HISTORY

FLUTTER INTERN (REMOTE)

DevelopersHub Corporation© , Remote

- Completed a **remote internship in Flutter development**, focusing on mobile app UI and functionality.
- Built reusable UI components and screens using Flutter and Dart.
- Implemented basic navigation, user input handling, and responsive layouts.
- Learned real-world development workflow including **version control (Git)** and remote collaboration.
- Gained hands-on experience in converting designs into functional Flutter screens.

PROJECTS

FLUTTER SPOTIFY | BILL BOARD AUTOMATION APP

Engineered BillSpot, a music discovery platform featuring OAuth authentication and automated playlist curation via Spotify API integration. Implemented real-time data synchronization and playlist analytics to provide a seamless cross-device user experience.

FLUTTER ECOMMERCE APP

Architected a full-stack commercial application utilizing Firebase for cloud storage and real-time state management. Developed secure payment-ready workflows, dynamic product filtering, and asynchronous cart updates.

FLUTTER IMAGE DESCRIPTION APP

Deployed a computer vision application leveraging Gemini AI for automated image analysis. Built a robust RESTful architecture using Flask to facilitate high-speed image processing and secure inference pipelines.

FLUTTER AI CHAT ENTERTAINMENT APP

Developed a scalable cross-platform chat system with multi-session persistence and responsive design. Integrated Python-based AI models to deliver context-aware responses across mobile, tablet, and web environments.

BLOG WEBSITE

Constructed a secure Content Management System (CMS) using the Flask framework and SQLite. Engineered a full CRUD interface with an administrative dashboard for efficient resource management and user authorization.

SKILLS

- Flutter Development
- Problem-Solving
- AI Integration
- API Integration
- Sqlite Database
- Python Development
- Django Rest Framework
- Prompt Engineering
- Time Management
- Firebase Integration

EDUCATION

- University Of Karachi, Karachi Pakistan

Bachelor of Science, Software Engineering, Expected in 2028

 - Actively mastering **Software Engineering paradigms** and **Clean Architecture**, with a focus on delivering high-performance, scalable cross-platform solutions.
 - Spearheading the development of **production-ready applications**, translating complex academic theories into functional, user-centric mobile and web platforms.
 - Consistently exploring **emerging technologies** to stay at the forefront of modern software trends and technical innovation.
- Govt Dehli College, Karachi Pakistan

Intermediate (Pre-Engineering), 2022-2024

 - Graduated with a distinguished **82% aggregate** in Pre-Engineering, demonstrating academic excellence and a deep mastery of **Mathematical Logic** .
 - Developed a disciplined approach to technical problem-solving, consistently ranking among top performers while building the theoretical foundation necessary for **complex software architecture**.
- The Citizen Foundation School, Jhang Pakistan

Matriculation (Science), 2020-2022

 - Achieved a distinguished academic record with a final score of **93%**, reflecting a disciplined work ethic and a focused commitment to excellence in core science subjects.
 - Demonstrated an early aptitude for logical reasoning and technical problem-solving, laying the groundwork for advanced studies in Software Engineering.

- Google AI Essentials
 - Udemy C++ Programming
 - Google Prompting Essentials
- Udemy Python Programming
 - Cursa Rest APIs Python Django
 - Google UX Design

VOLUNTEERING

- TECHNICAL TEAM MEMBER

Sep 2025 – Present

Microsoft Learn Student Ambassadors - University of Karachi

 - Contributing as a core technical member to foster a culture of cloud innovation and AI literacy within the student community.
 - Collaborating on technical workshops and peer-led learning initiatives to bridge the gap between academic theory and industry-standard Microsoft technologies.
- TECHNICAL TEAM MEMBER

Apr 2026 – Present

AWS Cloud Club - University of Karachi

 - Leading technical operations for club events, overseeing hardware setup, network configuration, and live technical troubleshooting.
 - Collaborating with core leads to deploy digital resources and maintain the technical environment required for hands-on student training sessions.
- VOLUNTEER | ICISCT '26

Mar 2026 – Apr 2026

International Conference on Information Science and Communication Technology

 - Supported the execution of a major international technical conference, assisting in the coordination of science and technology sessions.
- VOLUNTEER | CAREER CONNECT 2025

Jan 2026

University of Karachi

 - Facilitated event logistics and student-employer engagement during the university's premier career networking summit.
